

The CBS-2021eG brews directly into our LUXUS® half gallon thermal dispenser L3D-05. All the great features of the EXTRACTOR® series: Independently programmable pre-wet percent, brew volume, brew time, brew temperature and drip delay.

FETCO's Cascading Spray Dome (CSD) is the latest breakthrough in extraction technology. The CSD's compact design provides the same full and even saturation as the large sprayhead of the EXTRACTOR® line plus it is easy to remove, clean and replace. Clean equipment means your coffee recipe's integrity isn't compromised. And that's all what we are here for -- a great cup of coffee.
